

Educational and Demographic Profile

Senate District 10
Senator Liz Figueroa

California Postsecondary Education Commission

Higher Education Regions

The map below shows the regions used by the California Postsecondary Education Commission (CPEC).

The regions represent areas that CPEC considers to have similar interests and needs related to education, employment, and other socioeconomic factors. Looking at these factors on a regional basis highlights the significant variations between different areas of the state and will assist policy makers in addressing the differing needs within California.

Additionally, dealing with issues in a regional context will encourage the type of cooperation, coordination and collaboration across institutional barriers that is necessary if we are to enhance the opportunities for people to achieve educational and workforce success.

Introduction

This profile presents a variety of educational, demographic and socioeconomic information for Senate District 10, nearby areas and the state.

The profile graphically displays information concerning the level of educational attainment, ethnic diversity, and income levels. The maps on pages 2 and 12 clearly show the relationship between educational attainment and income. The map on page 8 depicts the racial and ethnic makeup of the same area.

Presenting information in this manner is intended to provide legislators with a comprehensive picture of the condition of the people they represent and show how that compares with what exists in the area around their districts and the state as a whole. This profile is compiled and presented with the intent of enabling policy makers to have a comprehensive picture of the factors that influence an individual's opportunity to succeed in school and in life.

Highlights for District 10

- 41% of recent high school graduates in the district completed college preparatory courses, compared to 37% statewide. See **Preparation for College**, page 5.
- 25% of recent high school graduates in the district entered CSU or UC, compared to 18% statewide. See **University-Going**, page 3.
- 32% of the district population has a Bachelor's or higher-level degree, compared to 27% statewide. See **Educational Attainment**, page 7.
- 4.3% of children in the district are not proficient in English, compared to 5.8% statewide. See **Demographics**, page 10.
- Average household income in the district is \$80,700, compared to \$65,600 for the state as a whole. See **Socioeconomic**, page 11.
- There are 13 degree-granting institutions located within District 10. See **Local Colleges and Universities**, page 16.

College-Going

Percent of recent graduates of public high schools entering colleges and universities

Three-year average, 1999–2001

	District 10	California
Community colleges	31%	31%
CSU	14%	10%
UC	10%	8%
Independents	1%	1%
Total	57%	50%

Three-year average for nearby regions

	San Francisco Bay	Monterey Bay	North San Joaquin Valley
CCC	28%	26%	28%
CSU	12%	10%	11%
UC	11%	7%	4%
Independents	1%	1%	1%
Total	52%	44%	44%

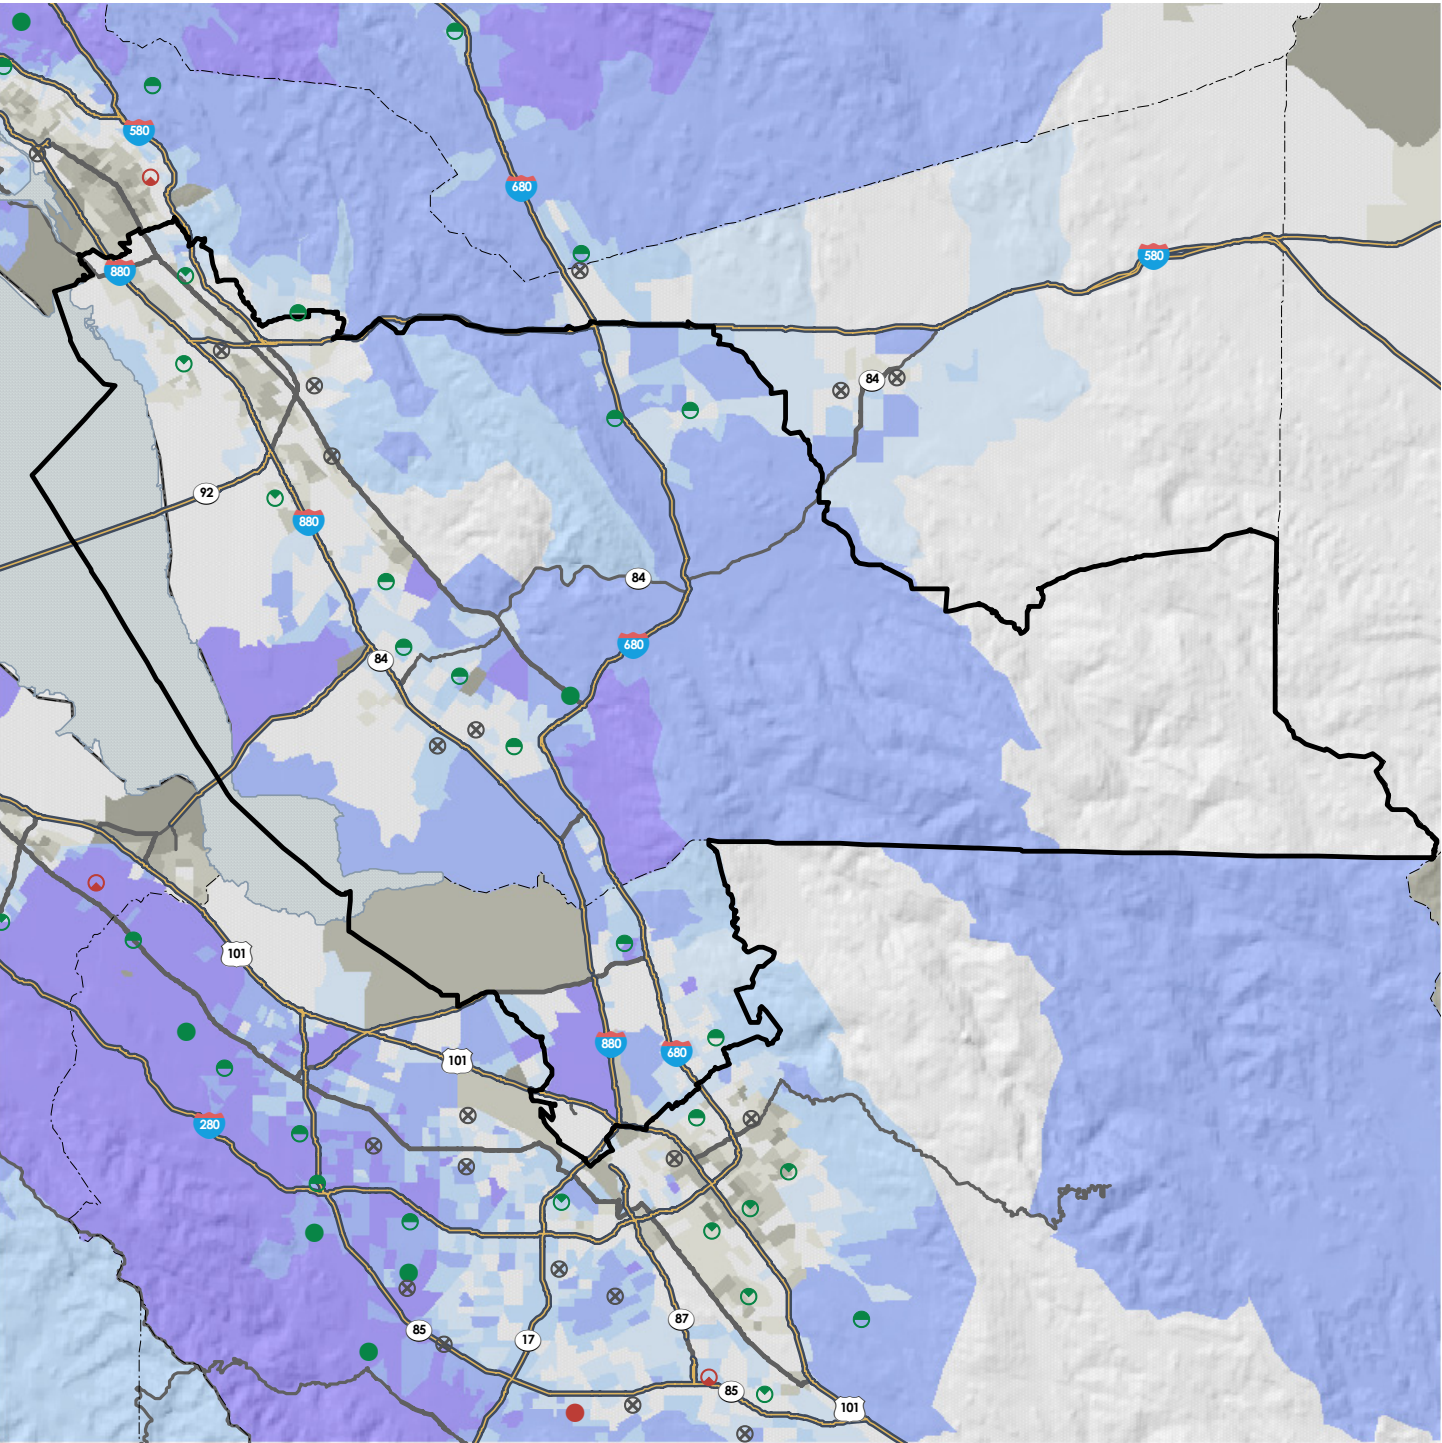

Data for independent colleges and universities is incomplete. Total excludes graduates entering other degree-granting institutions. See page 14 for a description of the postsecondary education systems.

Data from CPEC

Many of the displays in this profile compare statistics for District 10, the state as a whole, and some of the Commission's higher education regions. Senate District 10 is in the San Francisco Bay Region, which consists of the nine Bay Area counties. See inside front cover for a map of all 14 regions.

University-Going Rates for Public High Schools

University-Going Rates

Symbols are shown for public high schools with 100 or more graduates 1997-2001.

Percent of graduates entering CSU and UC, 1997-2000.

- 35% and over
- 25 to 35%
- 20 to 25%
- 15 to 20%
- 10 to 15%
- 5 to 10%
- 0 to 5%

Data from CPEC

University Education

Percent of population aged 25 or older with a baccalaureate, graduate, or professional degree.

Data from 2000 U.S. Census

- 65% and over
- 50 to 65%
- 40 to 50%
- 30 to 40%
- 15 to 30%
- 10 to 15%
- 6 to 10%
- 3 to 6%
- 0 to 3%

As in all parts of the state, university-going rates are low at high schools in areas where the adult population tends not to be university educated.

Percent of recent graduates of public high schools entering CSU and UC

Three-year average, 1999–2001

Values for legislative districts range from 8.5% (Assembly District 36) to 35.9% (Assembly District 12).

Student Fees and Cal Grant Aid

Annual fees for full-time students

	1980–81	1990–91	2002–03
Community Colleges	—	\$100	\$330
California State University	\$226	920	1,998
University of California	776	1,820	4,017

Fees at CSU and UC are the total of system fees plus the average of campus charges.

The Community College had no systemwide fees until 1984.

Figures for fiscal year 2002–03 are estimates based on budget information provided by the segments.

Number of Cal Grant A, B, and C awards

	2001–02	Increase from 1996–97
Community Colleges	39,900	152%
California State University	41,200	84%
University of California	37,700	28%
Independents	22,500	48%

Recent trends

Educational Attainment

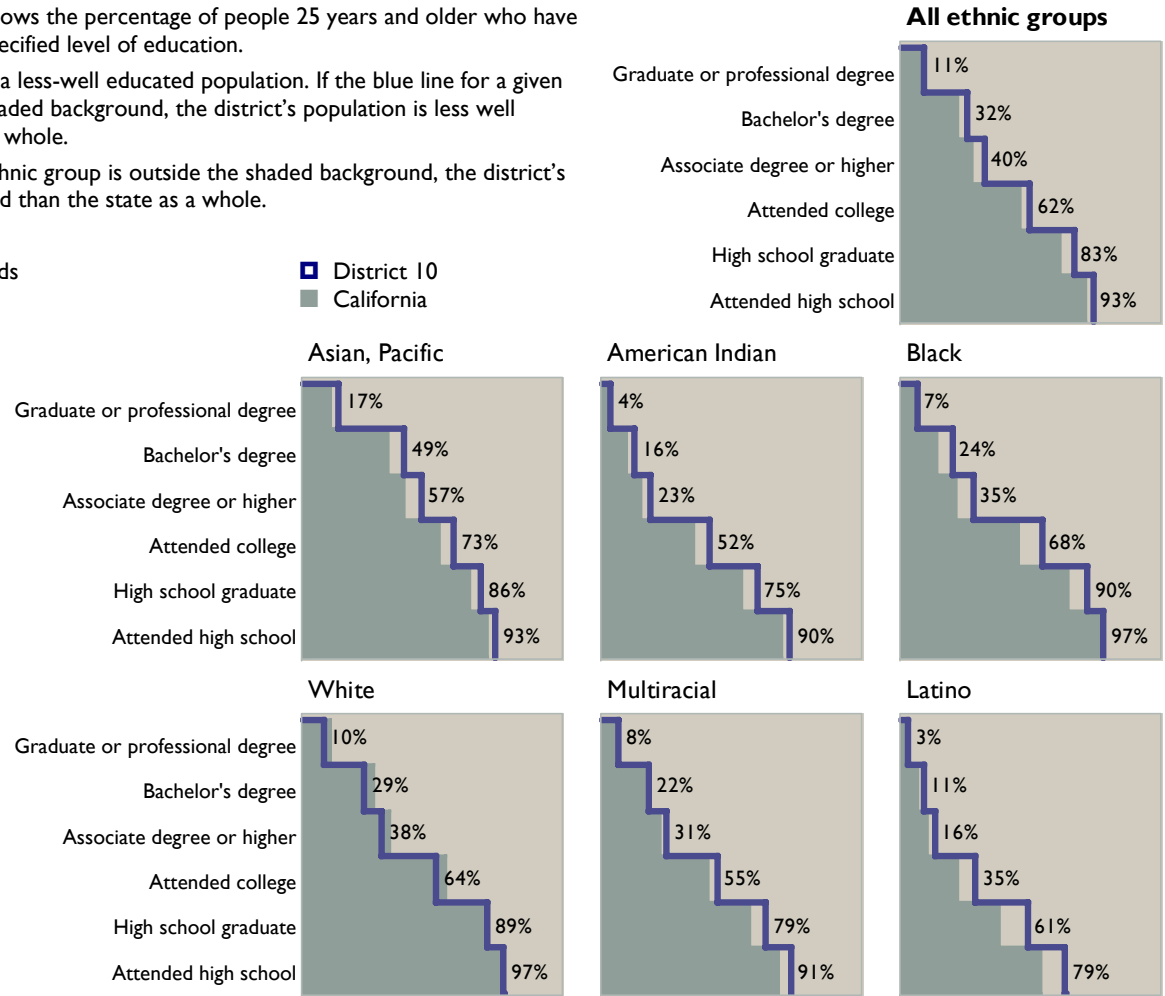

Education pyramid for persons 25 years and older

Each step on the pyramid shows the percentage of people 25 years and older who have attained or exceeded the specified level of education.

A thinner pyramid indicates a less-well educated population. If the blue line for a given ethnic group is inside the shaded background, the district's population is less well educated than the state as a whole.

If the blue line for a given ethnic group is outside the shaded background, the district's population is better educated than the state as a whole.

The numbers on the pyramids are for District 10

Percent of population with no college

Percentage of people 25 and older with no education above the high school level

Values for legislative districts range from 7.9% (Assembly District 70) to 66% (Assembly District 46).

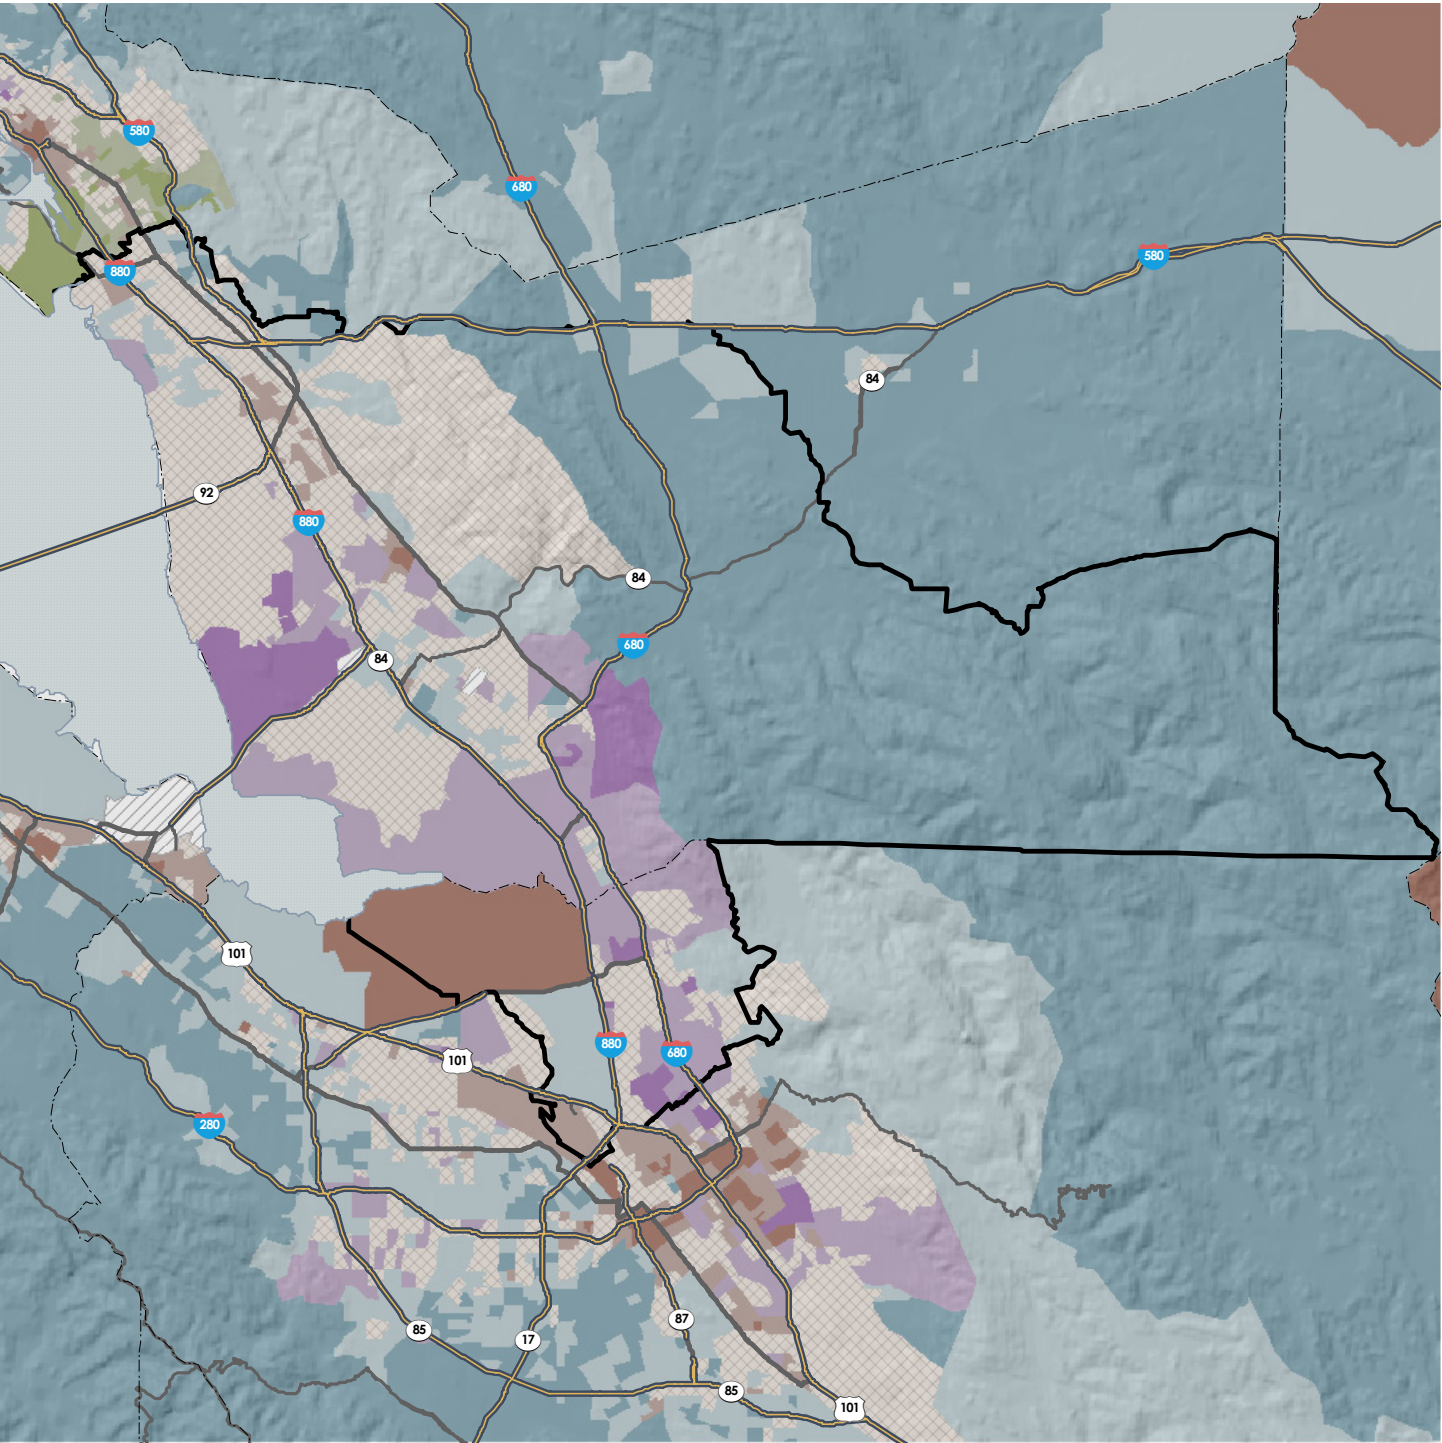

Percent by race and ethnicity

■ District 10
■ California

Data from 2000 U.S. Census

Racial and Ethnic Composition

Racial and Ethnic Composition

Population of Census Block group

- More than 70% Latino
- More than 50% Latino
- More than 70% African American
- More than 50% African American
- More than 70% White
- More than 50% White
- More than 70% Asian & Pacific
- More than 50% Asian & Pacific
- No race or ethnicity predominates
- Area with no residents

Figures for racial categories are for non-Latinos in each racial group. For example, in a block group shown as being more than 50% white, more than 50% of the non-Latino population identified themselves as white in the 2000 Census.

Data from 2000 U.S. Census

Demographics

Race and Ethnicity

Ethnicity and Race	District 10		California	
	Number	Pct	Number	Pct

All census data for legislative districts are estimates based on the census block groups most closely corresponding to the district boundaries. For an exact count of the district population, refer to census block data.

Data from 2000 Census

Presentation of Racial and Ethnic Data

The table, left, is unusual in that it shows a full two-way breakdown of the population by ethnicity and by race. The figures are based on responses to two separate questions in the 2000 Census: one asking if the person is of Latino ethnicity, and one asking the person's race.

Note that there are only two ethnic categories—Latino and Non-Latino. The other categories are racial categories. Statewide, about half of Latinos are in the 'Other race' category. This category includes people providing a write-in response to the race question, such as Mexican, Chicano, or Cuban.

This full breakdown by ethnicity and by race is not generally used by federal or state agencies. Instead, the ethnic and racial categories are combined in some way.

State education and population statistics. California state agencies generally publish statistics showing figures for Latinos and racial groups as exclusive categories. Figures for Latinos are for all Latinos, regardless of race. Figures for racial groups are for non-Latinos. The education data on pages 1–5 and 15, and the regional population growth table below use this grouping.

Census socioeconomic statistics. The Bureau of the Census publishes socioeconomic statistics using overlapping groups that do not match those used by other agencies. Statistics are published for racial groups, regardless of ethnicity, for Latinos, and for non-Latino whites.

The census Demographic, Socioeconomic, and Employment statistics on pages 7 and 10–13, and the Racial and Ethnic Composition chart, below, use this grouping. The bars for Asian-Pacifics, African-Americans, American Indians, and multiracials include Latinos in those racial groups. The bars for Whites are for non-Latino Whites. The bars for Latinos are for all Latinos, regardless of race.

Because of these differing systems for grouping data, Census statistics may differ from socioeconomic statistics published by other agencies.

Racial and Ethnic Composition

Percent of District 10 population in each racial and ethnic group.

■ District 10
■ California

Data from 2000 U.S. Census

Latino	1,298,700	20	251,000	21	719,000	15	10,688,800	17

Estimates from California Department of Finance, December 1998. These estimates have not been adjusted to match the 2000 Census results.

Demographics

Traditional college age population

Percent of total population aged 18–24

Values for legislative districts range from 6.2% (Assembly District 15) to 13.6% (Assembly District 46).

Percent of the population in each racial and ethnic group who are aged 18–24.

District 10
California

Data from 2000 U.S. Census

School age population

Percent of the total population aged 5–17

Values for legislative districts range from 8.5% (Assembly District 13) to 28% (Assembly District 52)

Percent of the population in each racial and ethnic group who are aged 5–17

District 10
California

Data from 2000 U.S. Census

Lack of English Proficiency

Percent of children aged 5–17 who speak another language at home and speak English “not well” or “not at all”.

Values for legislative districts range from 1.4% (Assembly District 4) to 19.7% (Assembly District 46).

District 10 has a total of 156,200 children aged 5–17. Of these, 6,700 are not proficient in English. The language spoken at home by these children is as follows:

	District 10	California
Spanish	54%	84%
Asian & Pacific languages	38%	12%
Other languages	8%	4%

Data from 2000 U.S. Census

Socioeconomic

Average Household Income

The state average is \$65,600. Averages for legislative districts range from \$33,200 (Assembly District 46) to \$131,100 (Assembly District 21).

The average income, rather than the median income is presented here because the median for a legislative district cannot be calculated from publicly-available census data.

Average household income in thousand dollars by race and ethnicity

District 10
California

Data from 2000 U.S. Census

Percent of children living in poverty

Percent of children living in families whose income is below the federal poverty threshold.

The poverty threshold depends on the total number of people in the family and the number of children under 18. For example, the poverty threshold for a five-person family with three children under 18 is \$19,992.

Values for legislative districts range from 4.8% (Assembly District 19) to 43% (Assembly District 46).

Percent by race and ethnicity

District 10
California

Data from 2000 U.S. Census

Percent of children eligible for school lunch program

Values for legislative districts range from 13.3% (Assembly District 15) to 84.6% (Assembly District 46).

Data from CPEC

Median Household Income

Median Household Income

Data from 2000 U.S. Census

- \$100,000 and over
- 80,000 to 100,000
- 65,000 to 80,000
- 55,000 to 65,000
- 45,000 to 55,000
- 35,000 to 45,000
- 25,000 to 35,000
- 15,000 to 25,000
- less than \$15,000

Compare with the map on page 2. The pattern of income distribution is strongly related to the pattern of educational attainment.

Employment

Unemployment rate

Number of unemployed workers as a percentage of the labor force at the time of the 2000 U. S. Census

Values for legislative districts range from 3.0% (Assembly District 19) to 19.2% (Assembly District 30).

Unemployment rates by race and ethnicity

■ District 10
■ California

Data from 2000 U.S. Census

Professional and managerial workers

Percent of employed labor force in professional and managerial occupations

Values for legislative districts range from 12% (Assembly District 46) to 59% (Assembly District 22).

Data is not available by race and ethnicity

Data from 2000 U.S. Census

Prison-Going

Prison population

	San Francisco Bay	Monterey Bay	North San Joaquin Valley	State total
African-American	8,420	330	2,730	47,350
White	5,660	680	4,260	45,730
Latino	4,710	1,140	5,170	55,860
Other	1,720	100	710	8,660
Total	20,510	2,250	12,870	157,600

Prison populations based on the county from which the prisoner was committed.

Population as a percentage of the total population

	San Francisco Bay	Monterey Bay	North San Joaquin Valley	State total
African-American	1.4%	1.2%	2.7%	2.0%
White	0.2%	0.2%	0.3%	0.3%
Latino	0.3%	0.4%	0.7%	0.5%
Other	0.1%	0.2%	0.3%	0.2%
Total	0.3%	0.3%	0.5%	0.4%

Prisoner population from California Department of Corrections. Rates calculated by CPEC using population estimates from the Department of Finance.

Postsecondary Education in California

The Master Plan for Higher Education, created in 1960 and renewed in 1989, provides a framework for public higher education in California and outlines specific missions for each of the public systems. Independent and private colleges and universities also play a vital role in the state's ability to provide postsecondary education opportunities.

A directory of degree, certificate, and credential programs offered at California higher education institutions is available in *California Colleges and Universities* at www.cacollegeguide.com.

The California Community Colleges (CCC)

The community college system consists of 72 locally governed districts operating 109 campuses, as well as numerous off-campus centers. A 16-member Board of Governors appointed by the Governor is designed to serve as a coordinating and regulatory agency for the local districts. Admission is open to any high school graduate or person over age 18 who can benefit from instruction. Community colleges offer academic and technical programs at the freshman and sophomore level, many leading to transfer, as well as instruction in basic skills, English as a second language, and citizenship classes. The community colleges award the associate degree and technical certificates in a variety of areas.

The California State University (CSU)

The CSU system consists of 23 campuses and seven off-campus centers. The system is governed by a 24-member Board of Trustees appointed by the Governor. Admission of first-time freshmen is generally limited to the top one-third of California's high school graduates. The CSU provides instruction in the liberal arts and sciences and applied fields, grants degrees at the bachelor's and master's degree level and may award doctorates jointly with the UC or an independent university. Currently CSU offers degree programs in more than 200 subject areas.

The University of California (UC)

The UC consists of 9 general campuses, one health science campus, and numerous special research facilities. The UC has constitutional status as a public trust and is governed by a 26-member Board of Regents. Eligibility for admission as a freshman student is extended to the top one-eighth of California's high school graduates. UC offers programs leading to the baccalaureate degree at each general campus. The UC also offers masters and professional degrees and has sole authority among public institutions to award doctoral degrees.

The Association of Independent Colleges and Universities

The Association of Independent Colleges and Universities (AICCU) consists of 75 independent colleges and universities, accredited by the Western Association of Schools and Colleges (WASC). These institutions range from large, world-renowned universities to smaller liberal arts institutions and professional schools. AICCU institutions enrolled over 217,000 students in 2001.

Other WASC-Accredited Private Institutions

Forty-eight additional California institutions are accredited by WASC, but are not members of AICCU. These institutions enroll some 30,000 students, and also range from universities to smaller institutions and professional schools.

Other Degree-Granting Institutions

California has about 300 other institutions that are authorized under state law to award degrees. These include religious seminaries, schools of alternative medicine, law schools, and universities accredited by organizations other than WASC.

In addition, California has an estimated 3,000 schools that offer programs not leading to a degree. This category includes schools providing training for careers in computer technology, health care, and in a wide variety of business and technical occupations.

All of these schools and colleges are regulated by the Department of Consumer Affairs, Bureau for Private Postsecondary and Vocational Education (BPPVE).

About the Commission

The California Postsecondary Education Commission is a citizen board established in 1974 by the Legislature and the Governor to coordinate the efforts of California's colleges and universities and to provide independent, non-partisan policy analysis and recommendations to the Governor and Legislature.

Members of the Commission

The Commission consists of 16 members. Nine represent the general public: three are appointed by the Governor, three by the Senate Rules Committee, and three by the Speaker of the Assembly.

Five members represent the educational segments. Two student members are appointed by the Governor.

Commissioners representing the general public are:

Alan S. Arkatov, Los Angeles—*Chair*
Howard Welinsky, Culver City—*Vice Chair*
Carol Chandler, Selma
Guillermo Rodriguez Jr., San Francisco
Evonne Seron Schulze, San Diego
Olivia K. Singh, San Francisco
Faye Washington, Los Angeles

Commissioners representing the educational segments are:

George T. Caplan, Los Angeles—*California Community Colleges*
Irwin S. Field, Beverly Hills—*Association of Independent California Colleges and Universities*
Odessa P. Johnson, Modesto—*University of California*
Anthony M. Vitti, Newport Beach—*California State University*

The student commissioners are:

Rachel E. Shetka, Napa

Four commissioner positions are vacant.

Contact the Commission

Information about the Commission and its publications is available at www.cpec.ca.gov or call (916) 445-7933.

In addition, the Commission publishes *California Colleges and Universities*, available at www.cacollegeguide.com.

Profiles for other Legislative Districts

Profiles for all state legislative districts are available at www.cpec.ca.gov/profiles/profiles.asp.

Commission Priorities

Changing demographic and economic conditions create new challenges for education and our economy in the years ahead. California's 2000 census data indicates that our population grew by more than 4.5 million people during the 1990s. While the size of the growth is notable, the major challenges will arise from the diverse nature of the growth—particularly with respect to geographic location, race and ethnicity, economic status, educational attainment, and academic preparation.

The California Postsecondary Education Commission adopted a *Public Agenda* that sets forth four critical themes central to the future of California and its citizens.

- **Growth and Access.** California's challenge is to ensure equal opportunity in the face of unprecedented enrollment demand, significant variances in the types of students seeking higher education, and limitations on the resources available to serve the myriad demands and needs.
- **Preparation for Postsecondary Education.** California's challenge is to ensure that all residents complete their high school education and obtain the core competencies necessary to succeed in the workforce or higher education.
- **Achievement.** California's challenge is to ensure that as many students as possible are able to complete the course of study they have embarked upon—particularly baccalaureate degrees.
- **Workforce Preparation and Economic Development.** California's challenge is to ensure better linkages between education and the needs of the new economy through shared, coherent systems of workforce preparation programs that blend theory and applied learning throughout the curricula.

Ensuring that the fundamental goals of access, accountability, diversity and quality remain priorities in higher education regardless of budget considerations is a challenge facing the Commission, the educational institutions and all policymakers.

Robert L. Moore, *Executive Director*
